SAVE THE PLANET

EMPOWERED MINDS PRESENTS A “GO GREEN PROJECT INITIATIVE INDIA”

JIVANAM POWERED BY EMPOWERED MINDS

SAVE WATER

SAVE TREES

SAVE ENERGY

“GO GREEN PROJECT INITIATIVE INDIA”- JIVANAM

Empowered Minds Recycle Club aspires Teachers & Students to work collaboratively to reduce the amount of waste produces in our Country. Getting our students and teachers to involve in recycling is good for the environment and education can be lot of FUN in learning!

Educating our children about the importance of recycling provides the country with a path to a greener future.

Besides the obvious environmental and social benefits, using recycle paper products in your institutions can be an asset and is good to demonstrate a commitment to the environment!

ENVIRONMENTAL BENEFIT STATEMENT:

By using Empowered Minds JIVANAM Program by learning how & why to protect nature? You can show that the environmental savings that your Institution is making with ‘EBS’. This will show the exact amount of landfill, CO2, Wood, Water & Energy you are saving by using Ethical paper that is 100% recycled paper products and learning to use the waste papers in making the daily needs in school for writing purposes.

WHAT BENEFITS ENVIRONMENT?

VIRGIN PAPER vs ETHICAL PAPER

ENVIRONMENTAL RESOURCES	1 TON VIRGIN FIBER PAPER	1 TON 100% ETHICAL PAPER	ENVIRO SAVINGS ETHICAL CONTENT
TREES	17 TREES	0 TREES	100%
ENERGY	1200 UNITS	275 UNITS	77%
GREENHOUSE GASES RELEASED-CO2 EQUIVALENT	2540 KGS	1602 KGS	37%
WASTE WATER	40000 LITRES	1000 LITRES	98%
SOLID WASTE	871 KGS	160 KGS	82%

Ethical Papers vs Regular Paper- Judge on your own!!

Regular paper uses wood fibre, largely from plantations. Plantations are monocultures that often displace our native forests.

Native forests absorb carbon dioxide, act as water catchments and are homes to animals and much biodiversity. By using paper made from paper pulp with ethical content, you reduce demand for native forest logging.

Post-consumer waste paper is even more preferable as it has been used once and then collected for recycling. Each ton of post-consumer-waste Ethical paper saves 17 trees, 40000 litres water, & 300 to 400kwh of energy. Regular paper products is been bleached with chlorine(toxic)

GREENEST OPTION

When it comes to paper communication, Ethical paper is the greenest option. Uses less energy-uses less water-produces lower carbon emissions than the manufacturing of non-ethical paper

Reduces the amount of landfill-as paper can be recycled 4 to 5 times

With advances in technology and processes, Ethical paper is now as good as the same print performance as non Ethical paper.

REDUCES CO2

Burying waste paper as landfill releases methane gas, which is 23 times higher and harmful to the environment than CO2. Recycling reduces CO2 emissions by 55% in comparison with incinerating the paper!

LESS ENERGY

The process of creating Ethical Paper uses 77% less energy. It takes 1.1 ton of ethical fibres to produce 1 ton of ethical paper, but it takes 2.5 tons of wood to make 1 ton virgin fibre paper!

Before throwing that piece of paper in the trash, consider how many trees you could save by starting a recycling program in your office or school. Even recycling newspapers and paper products at home can generate neighbourhood interest and help save the earth. The advantages of recycling paper go far beyond saving trees and can start with a single piece of paper...
